

Amendments to the Specification

Please replace paragraph 0043 with the following amended paragraph 0043

[0043] Cart liner 400 may be composed of any suitable pliable material capable of being folded, collapsed or bunched. The cart liner 400 material may be composed of light-weight plastic, paper product, or fabric material. Suitable material may include thermoplastic, polyolefin, such as polyethylene, polypropylene, polyesters, vinyl polymers, or the like. In an exemplary embodiment, the liner is constructed of a non-padded and non-porous material. In another exemplary embodiment, liner 400 may be composed of water proof or leak proof paper material, such as for example Kraft paper. The paper material may be made leak proof or water proof by any conventional lamination methods. For example, the liner 400 may be laminated on the liner upper surface (shown in Figure 5), the liner bottom surface (shown in Figure 6), or both. In other exemplary embodiments the material may be disposable or recyclable. The material may be composed of single layer or composite layer sheets.
